

Uridan Crew

By designer uridan a/s

The Uridan Crew trough urinal is ideally suited for venues catering for a large number of males.

Danish Design:

The simple shape and smooth, rimless surface make the urinal easy to maintain, delivering a high level of hygiene in amenities.

The robust and resilient fibreglass material provides protection against vandalism and the extra large waste trap makes this trough urinal particularly easy to maintain.

Water & Cost Savings:

The cost efficiency of the uridan range begins with the simple installation. The trough does not require complex pipework, cisterns, sensors, timers or flush mechanisms. Simply connect to a standard 50mm waste pipe.

As the urinal requires no water for flushing, the water and energy savings are clear.

Simple maintenance:

The Crew uses no water in its operation. The urinals contains an odour blocking fluid (uriLOCK) which forms a barrier between the user and the sewer. Periodically, the waste trap is drained into the sewer before the odour barrier is reinstated. This task is completed by priming the waste trap with water and uriSTRONG, then adding the biodegradable uriLOCK blocking fluid. It's that simple.

No plastic inserts, deodorising blocks, mats or 3rd party devices are required. Simply pour in the uriLOCK blocking fluid and the urinal is ready for use.

Product Specifications:

Models:

- GR1200 – 3 Width 1200mm
- GR1800 – 3 Width 1800mm
- GR2400 – 3 Width 2400mm

Materials:

- GRP (glass reinforced plastic)

Installation:

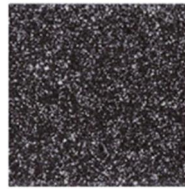

- Wall or Floor waste fitting

Colours:

- Available in Stone Grey and Granite

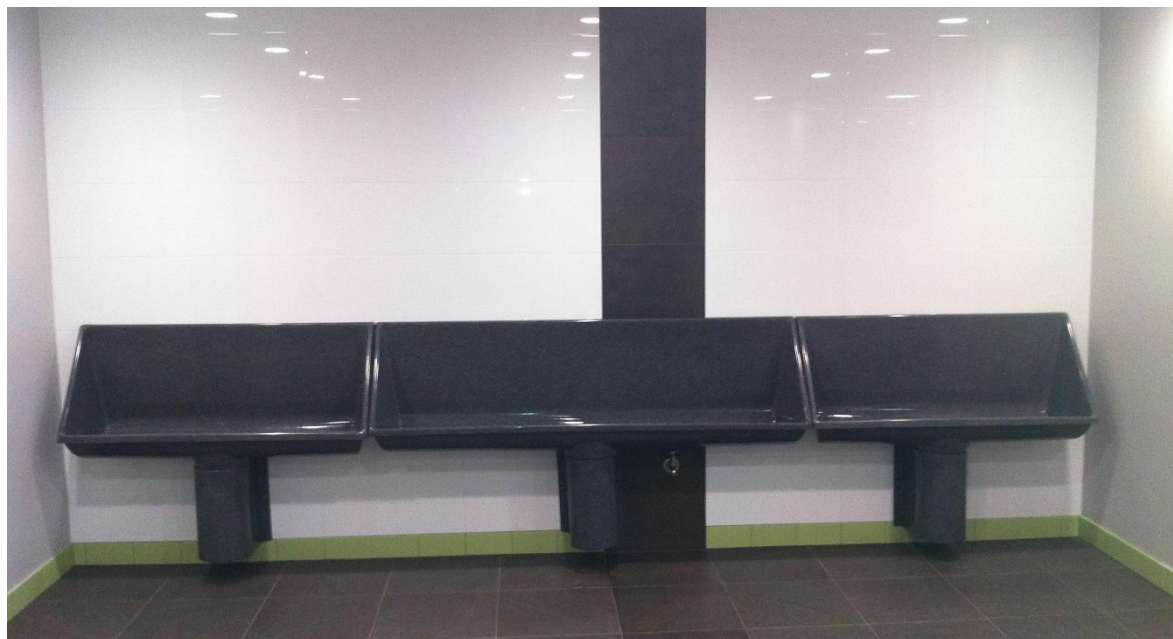

Stone Grey

Granite

Specified for:

Widely used in football stadiums, sporting venues, entertainment centres, schools, mining sites, demountable buildings, portable amenities, ablution blocks, change rooms, clubs, warehouses and factories.
