

Models: Compass & Captain

Compass by designer uridan

Captain by designer Yu Bobek

The Captain

The Compass

The Compass and Captain have gained popularity in low-energy homes in Europe. The versatile urinals can be used by men, women and children alike.

Distinguished by a simple unisex design, these models are popular for destinations with limited water supply.

Female and unisex waterless solutions are perfectly suited for event hire toilets where queues and water usage can be dramatically reduced.

The Uridan Captain is a hygienic alternative as there is no contact with the unit and no flush required to operate. Toilet tissue can be disposed of in a sensor activated waste bin that opens and closes automatically. Privacy can be maintained by installing the units in cubicles similar to conventional toilets.

Model:

- Compass GY Glass reinforced plastic (GRP)
- Captain GX Glass reinforced plastic (GRP)

Colours: Available in White

Installation: Floor Waste Fitting
