

Uridan Master
By designer uridan

The uridan Master is the latest addition to the uridan waterless urinal collection. Modern and elegant the Master is designed with a slightly higher urinal wall to boost comfort and privacy for users. The Master is the perfect solution when you are designing a stylish, statement bathroom with additional thought to user well-being.

Up Front Savings: A typical flushing urinal is 300% more expensive than the Uridan urinal because Uridan urinals do not require water, flush mechanisms, sensors and solenoid valves. Uridan requires only a waste pipe.

Simple Installation: Simply hang the urinal on the mounting brackets (supplied) and connect to the sewer pipe, prime the trap with 3 litres of water and add uriLOCK. The urinal is now ready for use.

Quick and Easy Servicing: No plastic inserts, deodorising blocks, mats or 3rd party devices are required. Simply pour in the uriLOCK blocking fluid and the urinal is ready for use. It's that simple.

Water savings: Uridan waterless urinals save an estimated 50-60,000 litres of water per urinal per year. As an example, a building with 20 single bowl Uridan urinals will save 1.2mL – equivalent to *\$3,600 - \$6,000 per annum! (*Sydney Water pricing)

Sustainable Buildings: Reach water conservation targets with ease with uridan waterless urinals

Product Specifications:

Models:

- GHM Glass reinforced plastic (Wall waste)

Installation: Wall waste fitting

Colours:

- GHM: Available in white, tele grey and black – plus special requests

white

Tele Grey
